

Fosters on Denman

“Imagine yourself in the quiet relaxing surroundings of this lovely rural island with spectacular views of Mount Washington and the mountains of Strathcona Park.”

Come and visit our charming waterfront heritage house on Denman Island. When you rent this holiday home you also get the stunning sunsets over the peaks of Strathcona Park.

Wake to the chatter of the eagles in the massive Douglas Fir tree leaning out over the seashore. Watch in awe as these magnificent birds swoop down to pick up a fish. Stroll along the oyster and clam covered beach in this tranquil setting, the silence broken only by the loons calling for their mates after they surface. While away the time watching the Piliated Woodpecker on 'his apple tree' or the hummingbirds collecting their lunch from the quince and apple blossom. Whilst hiking, cycling or driving around Denman Island you come across amazing ocean and mountain views, whether looking to the west, east, south or north. Discover our swimming lakes, or the wildlife that abounds, such as our frequent visitors, the deer, the pheasant and her brood or our neighboring llamas.

Come and stay in our heritage house, sink into the quiet relaxing surroundings, but, be warned, you may end up staying a little longer, as we did 15 years ago!
